Quality Monitoring

Use Your Data.

Collaboratively govern, improve & monitor data from assets to initiatives with activated metadata

Data Integration

Integration

Connectors

Move Your Data.

Easily design and deploy low-code, high-performance data pipelines anywhere

Modern MDM for Snowflake: Fast, Flexible, and Built for the AI Data Cloud

Snowflake-Native MDM:
Runs directly in Snowflake with native pushdown and governed sharing—no syncing, no external systems, no security gaps.

Fastest Time-to-Value:
Go live in under 12 weeks—faster than complex, integration-heavy tools on the market.

Lower TCO & Flexible Pricing:
Pay only for what you use. No extra infrastructure, no lock-in, no hidden costs.

Built-In Data Governance:
Stewardship, workflows, and audit logs included—no third-party tools or bolt-ons required.

Cloud-Agnostic & API-First:
While native to Snowflake, xDM supports hybrid, multicloud, and API-driven strategies for maximum flexibility.

Delivering success is our differentiator

75% of data initiatives fail to deliver value – here’s our easy, repeatable and proven formula

Partner With Great People

97%

Customers would recommend Semarchy in the last 12 months

Adopt Our Best Practices

80%

Customers go live in <12 weeks using our Rapid Delivery Blueprint

Deliver Proven Results

Augment your Snowflake ecosystem with a Data Platform

Data Management

Rapidly generate no-code hubs and apps to create and manage trusted data for any domain

Data Integration

Easily design, deploy & orchestrate low-code, high-performance data pipelines

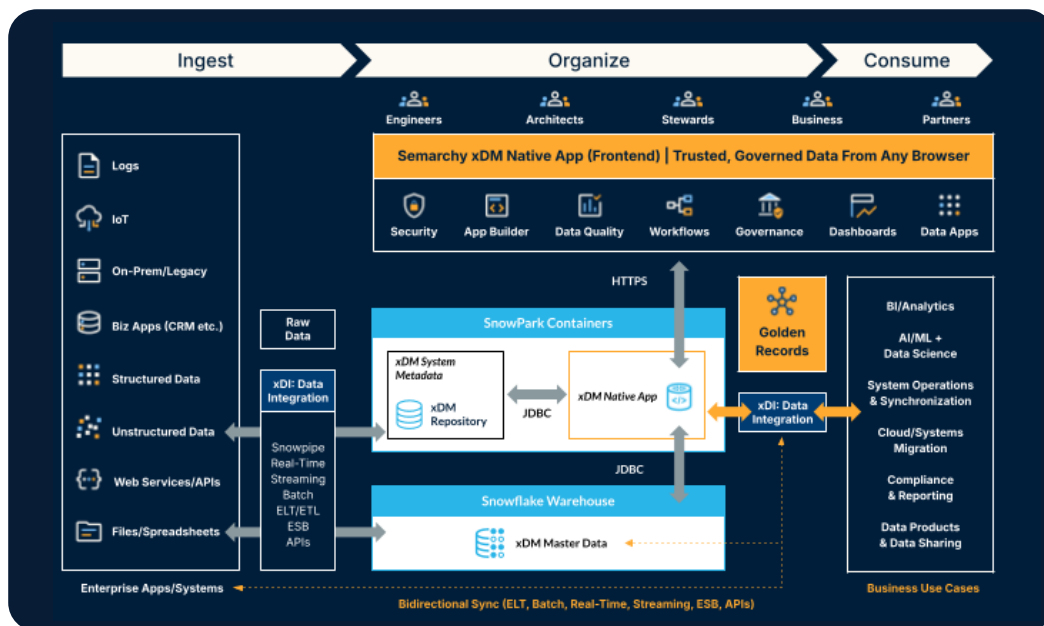

Data Intelligence

Collaboratively govern, organize and measure data assets with active metadata

Leverage your Snowflake Investment

Optimal usage of Snowflake native capabilities to support data at scale

Semarchy xDM: Seamless Master Data Management Native App on Snowflake

AI-ready, high-quality golden data

Provide trusted, governed inputs to your AI models, applications, and use cases

Fully customized models, rules & apps

Manage any domain and any hub style

Improve data quality & governance

Enrich, validate, match, and merge data automatically or with human oversight

Intuitive AI-augmented stewardship

Business-friendly UI/UX data apps with guided, AI-augmented data workflows

Data hubs and billing in Snowflake

Data stored and processed in your favorite engine, run as Native Apps in SnowPark, and consume directly via MCD
