

Is Your Data AI-Ready?

ASSESSMENT TOOL

Artificial intelligence (AI) isn't just a buzzword anymore; it's a necessary strategy for many businesses moving forward. Yet, many organizations are diving headfirst into AI initiatives without first addressing critical data gaps. Recent information from Gartner revealed that over 85% of AI projects fail, often due to insufficient data governance and infrastructure. Are you ready to beat the odds? Our AI readiness assessment tool will guide you through key considerations, offering personalized insights and actionable recommendations to prime your data for AI success. Let's get started and see where your data stands.

Data Quality Assessment

- 1 How accurate is your data across all sources?
 - Very accurate
 - Mostly accurate
 - Inconsistent
- 2 Is your data complete and kept up-to-date?
 - Completely and regularly updated
 - Mostly up-to-date, with minor gaps
 - Outdated or missing significant portions

- 3 How consistent is your data across various systems?
 - Highly consistent
 - Some inconsistencies
 - Major inconsistencies

Assessment

Data Governance and Compliance

- 1 Do you have a comprehensive data governance framework in place?
 - Yes, fully established and enforced
 - Partially, with some gaps in application
 - No formal governance framework

- 2 How well does your organization comply with relevant data regulations (e.g., GDPR, CCPA)?
 - Fully compliant
 - Mostly compliant, with occasional issues
 - Non-compliant in key areas

- 3 Is data stewardship clearly defined within your organization?
 - Yes, with dedicated roles and responsibilities
 - Somewhat, but with unclear accountability
 - No clear data stewardship

- 4 Are data ownership responsibilities clearly assigned?
 - Yes, ownership is clearly defined and understood
 - Somewhat, with some areas of ambiguity
 - No, ownership is not well-defined

Assessment

Data Integration and Accessibility

- 1 Is your data well-integrated across different systems?
 - Fully integrated
 - Partially integrated
 - Siloed and difficult to access

- 2 Can AI tools easily access the data they need?
 - Yes, data is readily accessible
 - Somewhat, with occasional barriers
 - No, accessibility is a major challenge

- 3 Is your data standardized for seamless use across different platforms?
 - Fully standardized
 - Partially standardized
 - Not standardized

Assessment

Scalability and Infrastructure

- 1 Is your data infrastructure scalable enough to support AI workloads?
 - Fully scalable
 - Somewhat scalable, with potential limitations
 - Not scalable

- 2 Do you utilize cloud or hybrid solutions for data storage and processing?
 - Yes, with advanced cloud or hybrid solutions
 - Partially, with some reliance on traditional systems
 - No, primarily on-premises

- 3 Can your infrastructure handle real-time data processing?
 - Yes, with real-time capabilities
 - Somewhat, with occasional delays
 - No, processing is primarily batch-based

Assessment

Personalized Report

Based on your responses, here's your personalized assessment of your data's AI readiness:
